

Coats Dual Duty

Coats Dual Duty is a premium quality cospun thread that combines a high tenacity polyester filament core with a natural cotton cover. The filament core offers excellent strength and durability, while the long staple cotton wrap ensures excellent sewing performance and protects the core from needle heat.

Main Uses:

- Classic denimwear and jeans
- Heavy duty outdoor wear and cargo pants
- For soft, natural feel seams on fine cotton fabrics and for premium lingerie
- High speed sewing operations for towels and home furnishings

Why choose Dual Duty?

- Dual Duty delivers excellent sewing performance in the most demanding applications.
- The high tenacity polyester filament core allows the use of finer thread sizes improving seam appearance without compromising seam strength.
- Excellent wash-down characteristics make Dual Duty ideal for denimwear and jeans.
- Outstanding abrasion resistance for demanding jeans and workwear applications.
- Certified to Öko-Tex Standard 100, class I, the most stringent class covering textile items for babies and toddlers.
- Meets Coats restricted substance list.

Dual Duty special use products

Where cotton threads are simply not good enough, specialist Dual Duty products are an option for garment dye. These specially-engineered threads are particularly suitable for high stress applications or heavier fabrics where the inherent weakness of cotton thread is a barrier.

Product Name	Description
Dual Duty Supercotton	Dual Duty with more cotton cover, available with the polyester core pre-dyed in shades light, medium, dark, indigo
Dual Duty Core Dyed	Dual Duty with the polyester core dyed to the same shade as finished garment

Please refer to our information hub; apparel expertise section for further guidance on sewing post-dyed garments:

<http://www.coatsindustrial.com/en/sewing-post-dyed-garments>

For garment dye, as fabric fibre content is outside our control, Coats strongly recommends preliminary testing of garment dye and finishing technologies to ensure the thread is suitable for the end use intended. Technical information listed above is based on current averages and should be taken only as indicative. Some very bright shades do not possess the high level of bleach fastness displayed by the majority of shades. We recommend that these be checked before use in any application involving bleaching agents, in particular for swimwear or garment finishing processes.

Since conditions and applications vary considerably in the use of a product, the customer and/or user should assure herself or himself that the product meets end customer requirements and is suitable for the intended end use. Coats accepts no liability for unsuitable or improper use or application of products.

Information provided above is based on current averages and should be taken only as indicative. Coats accepts no liability for the preciseness and correctness of the information provided.

Product information sheets are updated from time to time, please be sure you are referring to the most recent publication. Coats supports customers with advice on individual applications on request; if you have any questions or concerns, please contact us.
