

Coats® Hemseal™ Fusion

Coats Hemseal Fusion is a co-polyamide monofilament sewing yarn with specific low temperature melting characteristics which is designed for use in the production of sewn, bonded seams.

Coats Hemseal Fusion is designed to be fed into the overedge machine together with a standard Coats sewing threads. Hemseal Fusion can be combined with any Coats thread type, size and shade for ultimate flexibility on the factory floor.

FT01	40	70	1000m	500	110°C	55 - 60

EXPERT REAL WORLD SUPPORT

The final cost of any thread also includes hidden costs, fuelled by the methods and tools applied to it. Our experts know exactly how to reduce those costs, save time and increase productivity.

One to One Visits

There's no need to come to us, our experts will travel to your site. In person, online or via the phone, our trained consultants deal with the kind of issues any busy factory may face, providing a solution for today and a blueprint for future efficiency.

Training and Presentations

From thread selection to stitch formation, the use of colour to solutions for common production issues, we take the learning gathered through years of hands on experience and present it in the form of high impact seminars, workshops and presentations.

Embroidery Service Centre

Our Embroidery Service Centre makes embroidering a design much easier, increasing productivity at the same time as enhancing the design itself. Email the design and any problematic issues to us and our technicians will email the improved design right back.

To drive your hidden costs down, talk to Coats. From thread audits in pre-production to the latest technological bulletins, we'll provide support that achieves measurable results.

For more information, talk to your Coats representative today or visit www.coats.com/hemseal-fusion
